

# Welcome to digital lunch seminar in e-Health!

## Digital tools to aid migrants

**Time:** 20 May 2024, 12.00 – 13.00

**Zoom link:** <https://liu-se.zoom.us/j/63082836653>

### **Helen – Digital interpretation apps for caregivers, patients, and education**

Worldish provides a communication platform called Helen which comprises of series of culturally adapted communication modules that help the immigrants in communication & language learning within healthcare, elderly care, or everyday life, through AI, translation tech and visual aids. Helen has been developed for communication within 60 languages across healthcare and other welfare settings.

**Speaker: Abishek Jacob, Worldish AB**

### **Development and testing of a culturally appropriate website within Primary healthcare, aiming to support self-care in migrants with type 2 diabetes**

Migrants from the Middle East is a vulnerable group regarding prevalence, self-care and knowledge about type 2 diabetes. We have, together with patients born in the Middle East, and healthcare providers in Primary health care, developed a culturally appropriate website, including written, audio, and video information about type 2 diabetes to support self-care in migrants with type 2 diabetes. After achieving feedback from a feasibility study, the website will be further developed and tested within Primary health care.

**Speaker: Sara Pettersson, HMCV**

**Language:** English
